

A whole house leak detector story

What does it do?

It will detect a leak and turn the water off to your home, business and apartment.

How much is it?

Installation fee \$125.00

Monthly fee \$35.00/month plus tax; this includes two sensors. Each additional sensor is \$5/month plus tax (1)

What maintenance is necessary?

None for you. For our company: (included in the monthly rental fee) we will visit your home or facility once a year and change all the batteries and cycle the 'turn off valve (connected to the main line of your home, apartment or business)'. Every five years we will replace the turn off valve.

Why should I rent this equipment from Boyett's Family?

For 50 years we have prepared ourselves to keep track of appliances that make your life better. Our facilities, computer system, fleet of vehicles have been designed to provide the best service in the world for equipment that you rent from my family. Our staff will provide you the best customer service in the world.

How do I enroll?

Call us (480) 969-7251

E mail us: hayden@azh2o.com

We are pleased to present to you a solution to detect leaks and floods and stop them in your home or business.

This product is manufactured in Israel.

We really like the people who are involved in distributing this product to us. Our main contact is named Dan. Dan rents a water softener and +Mg from my family. I keep learning that our customers help us develop the best water solutions. Here are several examples of our customers helping us create new products and services: alkalinity Reverse osmosis system was designed because of a client suggestion 'she wanted a higher Ph water – we listened'; the +Mg+pH+h2o+ro 'she wanted water that has extra Mg – we listened'; the Boyett's Family resin screen 'he said what are you doing about solving this serious problem – we listened'. We are so grateful that our clients spoke. I am so glad my staff took action.

Our new leak concept has been developed because Dan brought this idea to us. We have been waiting for the right product to share with you.

Our history with leak detection goes back to 2006 when we began installing leak controllers on all of our RO unit. If you rent a reverse osmosis unit from Boyett's; your unit has a leak controller. They work great.

The reverse osmosis leak control devices have been very helpful to us. They have detected many different types of leaks under the sink (the garbage disposal, leaking faucets; leaking drain pipes).

We want to prevent this happening to you (a flooded house, business or apartment building).

Over the last 50 years we have heard many stories of homes and businesses being flooded and much money being lost and wasted. With our leak and flood stop equipment – we plan to protect you from this inconvenience and loss.

When introducing new products it is our desire to share with you all the facts and important information.

Triple+ CLM™

Cloud-based Water and Gas Leak Management System for the Professional Installer

Triple+

Safe Connected Property

Triple+ CLM is the ultimate, cloud-based, mobile device-managed, IoT - compatible, fully certified and most affordable system in the world with regards to the prevention of Water and Gas leak damage. Water and Gas leakage in buildings stems from wear and tear,

frozen pipes, overflow and careless administration. Billions are spent annually in fixing plumbing leakage damages, not to mention the wastage of Water and Gas and the physical injury.

Insurance companies carry a huge financial burden resulting from the repair and renovation of damaged property. This in turn pushes consumer premiums even higher. As a result, the market demand for "smart grid" solutions — monitoring, detecting and reducing leakages — is inevitably growing.

Triple+ CLM line of products includes innovative battery operated and wireless water flood and gas leak detectors, repeaters, HUB, and shutoff units that enable the automated control of water and gas valves, all unified under the Smart Home umbrella and designed to avert water flooding, gas leakage and subsequent damages, injury and financial losses. The Triple+ CLM HUB serves as a Secure Gateway that ensures a secure communication between the listed smart home appliances and our proprietary cloud and mobile application.

Triple+ CLM easily integrates into the Smart Home IoT ecosystem, providing a unique cloud-based secure platform for Water and Gas Leak Management.

Triple+ CLM is the most effective system in addressing the root cause for water flooding huge damages, that is, the length of time it takes to discover and stop the leak. With Triple + CLMU you can reduce the damage by over 90%.

Triple +CLM is fitted in minutes with little to no infrastructure changes.

Installing the system requires no electrician.

About us

Triple+ is an innovative and leading manufacturer and marketer of products and services within the IoT

(Internet of Things) arena. Triple+ offers solutions for averting property damage, injury and financial losses due to gas and water leaks.

Triplet+ broad product and service portfolio are designed for use in commercial and residential environments.

The company's line of products, based on its own proprietary technologies and know-how, includes automatically shut off water and gas valves whenever risky events such as leaks are detected or when people leave buildings unattended.

Triple + helps home and office owners to increase operational efficiencies, improve customer safety and prevent damages.

When you invest in your water and gas infrastructure, innovation really matters, from the products themselves to the people behind them.

We offer solutions for the professional installers using rock solid materials and ground-breaking technology. Our team knows the industry inside and out, and provides end-to-end services.

Key features

The smart move to prevent water leak damages: Triple+ CLM" line of products' competitive advantages and strengths include:

- Wireless, battery powered shutoff valves and sensors
- Easy integration into the Smart Home and IoT ecosystem
- Robust, secured, always on, proprietary RF communication layer
- Cloud-based secure platform for mobile Leak Management
- Fully certified (FCC, IC, CE)
- No wire trenching
- Simple integration with alarm systems

Detect. Connect. Protect. +

CLM™ Connected Home

Triple+

Detect. Connect. Protect.

Breakthrough in Water Heaters Leak Damage Prevention

Triple+ CLM™ provides the most resilient water leakage detection system.

With its automatic shut off unit, water damages would be prevented while sending event notification to your smartphone in real time.

Triple+ CLM™ is the most innovative, wireless & battery operated system installed within minutes.

Triple+ NWL™

Water Leak Management System for the Professional Installer

Triple+ NWL is the ultimate, fully certified and most affordable system in the world with regards to the prevention of water damage. Up to 70% of water leakage and damage in buildings stems from wear and tear,

frozen pipes, overflow, and careless administration of water.

Billions are spent annually replacing carpets, flooring, damage to computers, furniture etc. not to mention the wastage of one of the most precious resources water, The direct results is wastage and financial loss.

Insurance companies carry a huge financial burden resulting from the repair and renovation of damaged property. This in turn pushes consumer premiums even higher.

Triple + NWL line of products includes innovative battery operated and wireless flood detectors, repeaters, remote control, and shut-off technologies that enable the automated control of water valves. This serves to avert water flooding and damages.

Triple+ NWL™ is the most effective system in addressing the root cause for flooding huge damages, that is, the length of time it takes to discover and stop the leak. With Triple+ NWL™ you can reduce the damage by over 90%.

Triple+ NWL™ is fitted in minutes with little to no infrastructure changes.

NWL™ Shut off Unit

The wireless, battery operated water valve is installed on the main water pipe. It shuts-off the water supply whenever a risky event is identified or when manually done by the operator. The system can be easily integrated with an existing alarm and IoT systems.

Shut off Specifications

Dimensions [in]	4.88 x 4.01 x 2.91
Weight [oz]	26.1
Power supply	CR123x2 batteries
Operating Voltage	3V
Battery life time	Up to 2 years
Primary Radio Frequency	433Mhz
Operating temperature	32-122F°

Part Number: NWL-IV-SL34-0-01, NWL-IV-SL12-C

NWL™ Flood Sensor Unit

The wireless flood sensor is installed in places where high chance of water flooding may occur. Whenever water is detected, an automatic command is sent to the Shut off Unit in order to shut-off the water supply.

Flood Sensor Specifications

Dimensions [in]	1.18 x 2.95 x 6.29
Weight [oz]	4.23
Power supply	X2 batteries AA
Operating Voltage	3V
Battery life time	Up to 2 years
Primary Radio Frequency	433Mhz
Operating temperature	32-122F°

Part Number: NWL-CT-FLD-DET-01

NWL™ Repeater Unit

The wireless repeater can be used in order to extend the communication range between the Shut off Unit and the controller.

Repeater Specifications

Dimensions [in]	2.32 x 3.14 x 0.98
Weight [oz]	0.88
Power supply	External Adaptor Input 110-240 V AC
Operating Voltage	5V
Primary Radio Frequency	433Mhz
Operating temperature	32-122F°

Part Number: NWL-CT-REPT-B-01

NWL™ Control Unit

NWL™ Control Unit is installed where manual control of the system is required. The controller communicates with the flood sensors and the Shut off Unit, displays the shut off unit position, the communication health, and allows manual control of the water flow.

Control Specifications

Dimensions [in]	1.02 x 2.67x 5.15
Weight [oz]	5.46
Power supply	External Adaptor Input 110-240 V AC
Operating Voltage	5V
Primary Radio Frequency	433Mhz
Operating temperature	32-122F°

Part Number: NWL-CT-ALRM-M-01

Call us for some more information (480) 969-7251

Footnotes

1. A more technical device can be added; that connects to your smart phone for \$55/month plus tax
